As required by federal law, the public is given an opportunity to comment on the consistency of proposed activities in the coastal zone undertaken or authorized by federal agencies. Pursuant to 31 TAC §§506.25, 506.32, and 506.41, the public comment period extends 30 days from the date published on the Texas General Land Office web site. The notice was published on the web site on Friday, January 15, 2021. The public comment period for this project will close at 5:00 p.m. on Sunday, February 14, 2021.

FEDERAL AGENCY ACTIONS:

Applicant: Grand Parkway Infrastructure, LLC

Location: The project site is located northeast of Houston, within Chambers, Harris, Liberty, and Montgomery Counties, Texas.

Latitude & Longitude (NAD 83): 29.854911, -94.869411

Project Description: The applicant is proposing to modify the currently authorized Department of the Army (DA) Permit SWG-2012-00153. The modifications will include:

1) Church House Gully (Stream 5): The design for this crossing has been modified from being straightened to facilitate drainage to adding a culvert crossing at Station 1355+00. Box culverts will be added under the Westbound Frontage Road (WBFR), Mainlanes (ML), and Eastbound Frontage Road (EBFR). Stream 5 will be straightened 427 linear feet where the culverts are proposed. In addition, a new driveway has been proposed along the WBFR at Station 1354+00 to maintain access for this landowner.

2) Hackberry Gully (FM 565 Drainage Improvements - Ditch 1): Ditch 1 is palustrine emergent wetland (PEM). This design modification consists of widening and enlarging the existing drainage ditch along FM 565 at the northeast corner of FM 565 and SH 99. The drainage ditch would outfall into Ditch 1 (Hackberry Gully). In addition, the existing access off FM 565 will be improved in order to maintain access to the adjacent property. The improvement will include an extension of the existing driveway over the future drainage channel.

3) Future Langston Boulevard Drainage Easement (Wetland 1, Wetland 2, and Wetland 5): A drainage analysis was completed for the project and it was determined that additional drainage would be required for the project. The future Langston Boulevard drainage easement consists of a 0.7-acre drainage easement. The drainage easement would be aligned parallel to the City of Mont Belvieu's proposed Langston Boulevard. The drainage easement would outfall into Wetland 5 (Hackberry Gully).

Type of Application: U.S. Army Corps of Engineers permit application # SWG-2012-00153. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

CMP Project No: 21-1138-F1

Applicant: Port of Corpus Christi Authority

Location: The project site is located in Corpus Christi Bay at Indian Point, Portland,

Nueces and San Patricio Counties, Texas.

Latitude & Longitude (NAD 83): 27.85109, -97.35711

Project Description: The applicant proposes the placement of a maximum of 5,000 cubic yards (cy) of sand along approximately 3 acres of the Indian Point shoreline to stabilize the soil, help absorb low-energy waves, and increase intertidal habitat conditions by establishing a stable slope for the shoreline. The sand fill would be placed along the shoreline below the High Tide Line (HTL) within the unvegetated bay bottom. Fill would not be placed within any existing seagrass areas. Nearshore segmented breakwaters placed in approximately 2 acres of bay bottom would further absorb wave energy offshore and create a low-energy environment in the lee area; they may be constructed of approx. 10,000 cy of material or units composed of concrete, rock, steel, mesh, geotextile, geogrid, bedding stone, piles, chains, anchors, floating platforms, oyster shell, or similarly placed within unvegetated bay bottom below the HTL. Oyster reefs would be constructed to provide new marine habitat; they would be composed of approximately 2,000 cy of shell hash, shell bags, live oysters, or similarly placed ma-

terial within unvegetated bay bottom below the HTL in an approximate 1.5-acre area.

The offshore breakwaters would be constructed using heavy construction equipment such as barge-mounted excavators, marsh excavators, or similar. The rock would be selectively placed to meet the designed breakwater parameters, elevations, and slopes. The beach fill would likely be constructed using land-based earthwork equipment such as loaders, mini excavators, and similar. The oyster reefs may be installed by hand and/or with heavy equipment such as an excavator. Construction material may be stockpiled on land away from any sensitive habitats and/or on barges anchored within the work area limits. Silt curtains or approved equal Best Management Practices (BMPs) would be placed adjacent to existing seagrasses. The water depths are shallow where the silt curtains would be placed, but stakes may be used to secure the curtain if needed. Stakes would be either installed by hand or pushed into the bottom using an excavator. Operations requiring sound mitigation such as impact driving are not proposed as part of this project. As the breakwaters are constructed, wave energy in the lee area (i.e., where the silt curtains would be located) would reduce. It is anticipated that the silt curtains would be stable, and the contractor would be required to monitor and maintain the curtains throughout construction to ensure their placement remains stable, and they function as needed.

Type of Application: U.S. Army Corps of Engineers permit application # SWG-2020-00839. This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. The consistency review for this project may be conducted by the Texas Commission on Environmental Quality as part of its certification under §401 of the Clean Water Act.

Public Notice - Proposed Amendment to the Home and Community-based Services Waiver Application

Due to the public health emergency resulting from COVID-19, the Health and Human Services Commission (HHSC) submitted a request to the Centers for Medicare & Medicaid Services (CMS) to amend the waiver application for the Home and Community-based Services (HCS) waiver program through an Appendix K. HHSC administers the HCS waiver program under the authority of §1915(c) of the Social Security Act. CMS has approved the HCS waiver application through August 31, 2023. HHSC has requested approval to implement the requested amendment until October 23, 2020. The proposed effective date for the amendment is March 13, 2020.

This request is for HHSC to make retainer payments to HCS program providers for residential support and supervised living when an individual, whose residence is a program provider's three-person residence

or four-person residence, is not receiving residential support or supervised living because the individual is living away from the residence during the COVID-19 public health emergency. Providers will be allowed to bill up to 90 days from March 20, 2020 to October 23, 2020 for individuals receiving residential support or supervised living.

CMS has determined that public notice requirements normally applicable under 1915(c) do not apply to information contained in an Appendix K. Therefore, states applying for COVID-19 §1915(c) Appendix K amendments are not required to conduct a public notice and input process.

An individual may obtain a free copy of the proposed waiver amendment, ask questions, obtain additional information, or submit comments regarding this amendment by contacting Luis Solorio by telephone or email.
